

Gloucestershire: Covid-19 prevention action

Let's do it for each other - let's slow the spread of covid

Reinforce national advice and guidance

- ✓ Wash hands
- ✓ Keep 2 metres apart
- ✓ Wear a face covering
- ✓ Isolate and get tested

Increased enforcement

- Investigate complaints linked to breaches of covid regs and issue fines and enforcement notices to those who break the rules
- Close places where there is an outbreak and block events from going ahead that aren't 'covid safe'
- Enhanced business checks and advice to ensure they are 'covid safe'

Positive case welfare checks

- Check people understand the self isolation guidance and are aware of the self-isolation support grant
- Check households have food and medication
- Firefighters standing by to do homes visits

Suspend all care home visits

- Director of Public Health to write to all care homes
- Important measure to protect the most vulnerable
- Work with care homes to make sure there are other, safe ways for residents and their loved ones stay in touch - exceptions for those who sadly have to say 'goodbye'

Community Protection Officers

- Out and about across the county
- Provide help and advice on covid dos and don'ts
- Offer guidance and support - not enforcement

Work with shielded group

- Advise to reduce social contact (but not full shielding)
- Provide details of support and advice
- Reminder to get a seasonal flu jab
